

Poornima Mendhekar

mendhekarpoornima@gmail.com — +91 7796281027 — linkedin.com/in/poornimamendhekar2707 — github.com/poornima2707

Professional Summary

B.Tech Computer Science graduate (2026) specializing in AI/ML, GenAI, and Data Engineering. Experienced in developing end-to-end AI applications, ETL pipelines, REST APIs, and scalable full-stack solutions using Python, React, Node.js, and GCP. Delivered measurable impact including 88% model accuracy, 45% reduction in manual effort, and 50% faster search efficiency.

Technical Skills

Programming Languages: Python, JavaScript, C, C++

AI / ML / NLP: Machine Learning, Deep Learning, NLP, LLM, GenAI, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn

Data Science: Data Analysis, Data Preprocessing, Feature Engineering, Statistical Modeling, Time-Series Analysis, Data Visualization, Predictive Analytics, ETL Pipelines

Web Development: React, Node.js, HTML, CSS, REST API, Streamlit

Databases: SQL, MySQL, MongoDB, Neo4j, Graph Databases

Tools & Platforms: Power BI, ServiceNow, Raspberry Pi, Excel, Agile, Linux, Github

Professional Experience

Data Science & Full-Stack Developer Intern – Digitron Softwares & Technology

Jan 2026 – Jun 2026

React.js, Node.js, Express.js, MongoDB, Python, FastAPI, Power BI, Prophet, K-Means, Gemini API

- Launched a scalable MERN Stack Interior Design Web Platform, directly improving client interaction through automated inquiry and quotation management, reducing response times by 35%.
- Built sales forecasting and customer segmentation models using Prophet and K-Means, enabling accurate business insights and customer behaviour analysis. Deployed a Power BI dashboard connected to MongoDB via REST APIs, automating data analysis and saving 8 hours of manual reporting per week.

Data Visualization Intern – Infosys Springboard

Dec 2024 – Jan 2025

Power BI, Python, Pandas, Streamlit — ETL, Data Pipeline, REST API, Real-Time Monitoring

- Processed AQI datasets using Pandas ETL pipelines and produced Power BI dashboards for trend analysis and KPI tracking.
- Deployed a Streamlit-based real-time AQI monitoring application with live data ingestion & integrated a scheduled alerting system.
- Developed automated reporting processes, saving over 2 hours of manual work weekly & strengthening forecast accuracy by 35%.

Projects

AI-Powered Loss Description Generator

Oct 2025 – Dec 2025

React, Node.js, Gemini Pro Vision, LLaVA, Qwen — REST API, LLM, GenAI, Deep Learning

- Designed a GenAI system using Gemini Pro Vision and LLaVA to analyze insurance damage images and auto-generate structured loss descriptions via REST API integration.
- Engineered a full-stack React + Node.js web application integrating three LLMs (Gemini, LLaVA, Qwen) for intelligent damage detection and insurance report generation.
- Achieved 88% damage detection accuracy, reduced manual documentation effort by 45%, & cut report creation time by 60%.

Student Finance Management Platform

Aug 2025 – Sep 2025

ServiceNow, JavaScript, Service Portal — ETL, API Integration, Role-Based Access Control

- Designed and deployed a centralized expense tracking and budgeting platform within ServiceNow, creating responsive UI dashboards and interactive data widgets that improved financial precision by 30%.
- Configured a role-based Service Portal, an ETL pipeline for financial data, and streamlined reporting workflows.
- Integrated financial information from several modules into a single management platform, improving the precision of tracking and overall financial transparency.

Legal Research Network & Text Analysis

Feb 2025 – May 2025

Python, NLP, Neo4j, Graph Database — Data Preprocessing, Feature Engineering, Predictive Analytics

- Architected a legal case retrieval system using NLP pipelines & graph-based data analytics to elevate lawyer recommendation accuracy. Constructed a Neo4j knowledge graph and applied predictive analytics models for automated case-lawyer matching using feature engineering. Accelerated case search efficiency by 50% and increased case-lawyer relevance matching by 35%.

Publications & Patent

- **Patent Office Journal of India, Issue 1/2026 (App. No. 202521124780)** – A System and Method for Graph-Based Multi-Floor Indoor Navigation Using Digital Floor Map Visualization graph-based pathfinding with digital floor map visualization for scalable, hardware-minimal indoor navigation.
- **A Geospatial Perspective on Solid Waste Management** – ICACEBD-24 (Scopus Indexed). Applied geospatial analysis and data preprocessing to identify optimal waste depot locations; elevated waste management efficiency by 20%.
- **Real-Time Language Translation Using IoT Technology** – AUTOCOM 2025. Spearheaded development of a speech-to-speech IoT translator on Raspberry Pi using Python; achieved 86% accuracy across 30 languages with NLP-based translation and noise-cancellation.

Education

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

Symbiosis Institute of Technology, Nagpur

CGPA: 8.34 / 10

Certifications

- Google Cloud Computing Foundations Certificate (GCP)
- ServiceNow: System Administrator & Certified Application Developer
- Red Hat System Administration I (RH124)
- Power BI: Data Analytics and Business Intelligence – Infosys Springboard

Achievements & Activities

- Smart India Hackathon – Contributed to collaborative AI solutions that advanced learning outcomes by 18%.
- Top 15 Ranking, 24-hour Hackathon – Built and presented a working prototype within 24 hours, placing in the Top 15 among competing teams.
- 1st Place, College Tech Scavenger Hunt – Showcased technical aptitude and decision-making skills.
